

## PROLOTHERAPY SUCCESS STORY

Name:

Date: July 2, 2008

Briefly describe your condition and life prior to prolotherapy:

I had acute right elbow tendonitis, which was making it difficult to continue working, I was told by workers comp. that the only solution was surgery, thank fully though I found prolo-therapy and now I can continue on with my life.

Please share any successes you've had with your condition as a result of your prolotherapy:

When I walked in for my 1st treatment I wasn't sure if it would work, naturally I thought I would always be in pain. However after my 1st treatment I felt significant improvement both in mobility and experiencing less pain. My condition continues to improve. I almost feel 100% better thanks to prolotherapy. I'm very glad I found Dr. Alderman and her magnificent staff.
