

# PROLOTHERAPY SUCCESS STORY

Name \_\_\_\_\_

Date: 11/5/05

Briefly describe your condition and life prior to prolotherapy:

Headaches every 3-5 days where my entire neck would knot up and be throbbing. Taking advil, tylenol, etc would only minorly help the ache, just numb it.

Please share any successes you've had with your condition as a result of your prolotherapy:

Now I have only had one headache in the last 3 months and it was no where near as intense as the ones I had gotten previously. This is a huge success and has enabled me to get a lot more done in life & spend a lot less time in pain & "resting" in bed.
